

Jasmin Aghassi-Hagmann received her M.Sc. in physics from Aachen University (RWTH), Aachen, Germany, and the Ph.D. in nanoelectronics from the Karlsruhe Institute of Technology (KIT), Karlsruhe, Germany. She worked several years as a research engineer on CMOS Low Power Technologies at Infineon Technologies AG in Munich, Germany. Later she joined Intel Mobile Communications in Munich, Germany as a manager for RF CMOS platform technologies. She joined KIT in 2013 as a group leader for low power electronics with advanced materials with special focus on printed electronics and was additionally appointed full Professor in electrical engineering at the Offenburg University of Applied Sciences, Offenburg, Germany.
